The perfect place to have a joint rendezvous. The lake holds many surprises for first-time visitors. For

example, who would expect a string of islands with sandy beaches? Or bald eagles?

Lake Texoma is great for all types of boating from power to sail. There's usually so much activity you can be entertained just watching all the boats on the lake. Personal watercraft, water skiers and wind surfers all consider the lake an excellent place to have fun.

Texoma is famous for excellent fishing for striped bass and other species. Plenty of professional fishing guides are available to ensure a great experience.

Lake Texoma is an immense playground - even off the water with two wildlife refuges, two state parks, fifty-four Corps of Engineers parks, twenty-six resorts and hundreds of campgrounds. Texoma's newest golf course, Chickasaw Pointe, brings a whole new level of excitement to an area already known for outstanding golf.

If you want to have a great weekend with fellow squadron and district members as well as meeting some squadron members from District # 21 and # 31, be sure to start making plans today!

The rendezvous is growing every year and you will want to be a part of it! We hope to see you there!
